Subject: Re: Dos Republicas destroyed (4) Archeological Sites of our Sacred Coahuilteca Ancient Land during construction Road(s) for proposed Coal Mine

John MacCormack

Our Clan received your Article dated 10/9/14. On August 26, 1994 Dos Republicas destroy (4) Archaeological Sites enclosed letter. Enclosed also inventory of more than 100 Archaeological Sites to be destroy for proposed Coal Mine. Archaeologist Galindo in 2006 indicated to the National Preservation Historical Eligibility List sites 41MV13, 41MV137, 41MV138, 41MV160 and Archaeologists Sergio Iruegas in 2005 added 41MV164. Further studies in more than 50 sites were Dos Republicas will build the following: Drainage water ditches, Hauling Roads, ect. Enclosed please find information pdf format. Please confirm/reply. Thank you.

1445 Ross Avenue, Suite 1200  
Dallas, TX 75202-2733

Re: Road Construction activities by Dos Republicas Resources Company at the Eagle Pass Mine, Maverick County, Texas (EPA, F2, F13, F14)

Dear Mr. Cox:

We have been informed by the Lone Star Chapter of the Sierra Club that there has been recent road construction at the proposed Eagle Pass Mine, and that this road construction may have impacted historic or prehistoric archeological resources. We have no evidence in our files that this undertaking was coordinated by EPA with our office in accordance with Section 106 of the National Historic Preservation Act, and we have also had no consultation with the Railroad Commission of Texas about the undertaking.

In examining our records on the locations of cultural resources in the proposed Eagle Pass Mine, and the route of the road, the road construction appears to have impacted site 41MV135; this site was recommended some months ago by our office for test excavations to evaluate its National Register eligibility. The road may have also impacted portions of 41MV143, 168, and 170; our office had recommended that these sites warranted no further work based on previous survey-level investigations sponsored by Dos Republicas Resources Company.

Given that the scope of the road construction was not coordinated between EPA, the Railroad Commission, and our office, and the unknown nature of the road construction impacts on these four sites (or others not previously identified along the road ROW), further archeological assessment is immediately warranted to determine the impacts to 41MV135 and any other previously undiscovered sites. Our recommendations are as follows:

- (a) the road right-of-way corridor (the width of the road and ca. 10-20 meters on either side of the road) should be examined by a qualified professional archeologist to determine if previously unrecognized archeological sites are present along the road ROW;

DRCP 00013597

Mr. William L. Cox, cont.

-2-

(b) if such sites are found, sufficient shovel testing and controlled hand and mechanical excavations should then be conducted to determine their National Register eligibility;

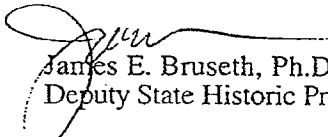

(c) site 41MV135 should be revisited by the professional archeologist to evaluate the extent of the road damage, if any, to assess whether new information is available to warrant a reevaluation of National Register status.

(d) these investigations should be described in a report submitted to EPA, the Railroad Commission, our office, the Advisory Council on Historic Preservation, and interested parties for review and comment, that meets the standards and guidelines of the Secretary of the Interior.

When these investigations are completed, and the documentation compiled for review, the consulting parties to the Programmatic Agreement for the proposed mine will be in a better position to assess site impacts, and determine what treatment measures may need to be implemented to minimize the impacts of this road construction. We look forward to hearing from EPA about this matter.

If you have any questions, please contact Dr. Timothy K. Perttula of our staff at 512-463-5866.

Sincerely,

James E. Bruseth, Ph.D.  
Deputy State Historic Preservation Officer

\*\* Recommendations set aside by THC following standards revisions (THC 1981)

\*\*\* Data recovery in progress in 2007 and 2008 by PBS&J. Fieldwork has been completed and an interim report has been submitted to THC. Clearance for mining activities is anticipated.

---

In the conclusions of their survey report (Uecker 1994), CAR recommended no further investigations at sites 41MV139, 41MV158, 41MV159, 41MV167, 41MV174–41MV181, 41MV191, 41MV192, 41MV196–41MV198, and 41MV200. Of the remaining sites, CAR recommended Phase I investigation at sites 41MV131, 41MV132, 41MV135–41MV138, 41MV141–41MV146, 41MV155, 41MV157, 41MV164–41MV166, 41MV168, and 41MV170–41MV173. Finally CAR recommended National Register of Historic Places (NRHP) eligibility testing at sites 41MV160, 41MV161, 41MV182–41MV190, 41MV193–41MV195, and 41MV199. Sites 41MV133, 41MV134, 41MV140, 41MV147, 41MV148, 41MV149–41MV154, 41MV156, 41MV162, 41MV163, and 41MV169, previously recorded by EH&A, were not considered in CAR's recommendations because they were outside of the then-proposed mine area (see Table 1).

In 1993, ACI conducted limited subsurface investigations at 37 sites (Uecker and Warren 1995) including 41MV131, 41MV132, 41MV135–41MV138, 41MV141–41MV146, 41MV155, 41MV157, 41MV160, 41MV161, 41MV164–41MV166, 41MV168, 41MV170–41MV173, 41MV182–41MV190, 41MV193–41MV195, and 41MV199. Two additional sites, 41MV201 and 41MV202 were also located during survey investigations but were only subjected to surface inventories. ACI recommended 21 of these sites for NRHP eligibility testing including 41MV135–41MV138, 41MV141, 41MV144, 41MV145, 41MV157, 41MV160, 41MV161, 41MV164, 41MV184–41MV187, 41MV189, 41MV190, 41MV193, 41MV199, 41MV201, and 41MV202 (see Table 1).

ACI also conducted a cultural resources survey of a proposed access road for Marston & Marston, Inc. in 1994. The road route crossed sites 41MV157 and 41MV168. No NRHP contributing elements were observed in the portions of the two sites within the proposed route right of way (Houk and Warren 1994).

In 2005, GTI Consultants conducted NRHP eligibility testing investigations for NAC at site 41MV164 (Iruegas and Iruegas 2005) and later at sites 41MV135–41MV138, 41MV144, 41MV145, and 41MV160 (Galindo et al. 2006). The two investigations concluded that sites 41MV144 and 41MV145 were not eligible for listing in the NRHP and that sites 41MV135–41MV138, 41MV160, and 41MV164 were eligible for listing in the NRHP and thus warranted archaeological data recovery to mitigate adverse impacts of the proposed mining activities.

In 2006 and 2007, PBS&J consulted with the THC and submitted to that agency a plan for archaeological data recovery at sites 41MV135–41MV138, 41MV160, and 41MV164 discussed above. After receiving THC concurrence, PBS&J implemented the plan in June 2007. This Data Recovery Plan and THC concurrence letter are included as Appendices 125-2 and 125-3 of this document respectively. Data recovery investigations at the six sites have been completed, and an interim report of these investigations has been submitted to the THC requesting clearance to impact the six sites. Completion of the analysis and draft report of investigations is anticipated in November 2008. Also in 2007, PBS&J developed a cultural resources treatment plan for the Eagle Pass Mine which is attached to this document as Appendix 125-4

---

## **CONCLUSION**

Known cultural resource sites within the Eagle Pass Mine that are currently protected and require further investigation are listed in Table 2 and their location is shown in Figure 125 (2)-1. They include 41MV141, 41MV157, 41MV161, 41MV184, 41MV185–41MV187, 41MV189, 41MV190, 41MV193, 41MV199, 41MV201, and 41MV202 where testing is required to determine NRHP eligibility; and sites 41MV134, 41MV140, 41MV147–41MV149, 41MV156, 41MV162, 41MV163, and 41MV169 where Phase I resurvey investigation is required. Additionally, all areas within the present mine that are outside of CAR's 1992 survey area, shown on Figure 125 (2)-1, including areas examined during EH&A's 1981 study, require cultural resources survey and evaluation prior to mining impacts.
